

How to Check Your Athlete's Class Level

Before registering for the next session, check your athlete's progress in ScoreFlippers to see whether they are ready to move to the next level.

Spending more than one 10-week session in the same class level is completely normal.

Every athlete learns at their own pace. More time at a level gives them the opportunity to build skills and confidence before moving forward.

1 Select your athlete

Log in to ScoreFlippers. Click My Athletes, then select your athlete's name to open their profile.

2 Open Programs

Under your athlete's name, open the dropdown menu that defaults to Profile. Choose Programs.

3 Look for Level Up

Find the current session and check the space after it.

If you see a Level Up icon: Your athlete should move to the next level in BAGC's Recreational progressive system.

4 Check Skills

Return to the dropdown under your athlete's name and select Skills. Look for the skills marked with an asterisk (*).

BAGC requires 3 stars on every asterisk-marked (*) skill before an athlete progresses to the next level.

These requirements support the safety and learning of your athlete and the other athletes in class.
